

TEXOVINIL ROJA

CHARACTERISTICS

Non-toxic hose manufactured through extrusion of vinyl compounds, reinforced with a mesh of polyester threads to provide it with a resistance to breakage from stretching in the elongation. The outer cover is orange and the inside is orange PVC. Very light, flexible and manageable, resistant to atmospheric agents and chemical products.

APPLICATIONS

Domestic watering, gardening, horticulture, floriculture and pleasure boats.

TEMPERATURES

From -10°C to +60°C.
